Climate change impacts developing countries exponentially more than developed countries and the developing countries are not the ones benefiting from the use of fossil fuels etc.
- C. Ground mounted solar array.
- D. Community composting.
- E. EV chargers
- F. Town based incentives for new buildings or renovations to exceed code requirements for efficiency, build electric and/or incorporating solar into design. Tax break? Cash back? What could the town actually do to incentivize? Could you forgive the first year of property taxes on a new build if there a solar array of a certain size or all electric house or passive house level insulation? A few thousand dollars might be enough to encourage some best practices.
