- VII. Discuss adequacy of information provided online**
<https://www.barharbormaine.gov/535/Long-Term-Rentals>
- VIII. Next steps**
- IX. Public Comment Period**
- X. Items for the next Agenda**
- XI. Adjournment**

January 24, 2024
Minutes

Minutes
Bar Harbor Long-Term Rental Registration Task Force
Wednesday, January 24, 2024
Auditorium – Third Floor, Municipal Building
4:00 P.M.

I. Call to Order

The meeting was called to order at 4:00 PM. Members present: Michele Gagnon, Planning Director; Todd Hardy, Chair and landlord representative; Erica Brooks, landlord representative; Philip Galperin, resident at large; Matthew Bartlett, Bar Harbor Fire Chief; Angela Chamberlain, Code Enforcement Officer; Joe Minutolo, Town Council representative; Jennifer Richardson, resident at large; Amber Howard, tenant representative; and John Mountford, Ellsworth and MDI Housing Authorities representative.

Heidi Hambrecht, tenant representative was absent.

Also present: Mike Gurtler, Deputy Code Enforcement Officer; Cali Martinez, Housing and Community Planner; and Shawn Farrar, Bar Harbor Story.

II. Recap

The Task Force members introduced themselves as there were some new attendees in the meeting.

Ms. Chamberlain reminded the Task Force that they last met in May of 2022 and prepared a set of recommendations that were sent to the Town Council and on October 18, 2022, the Town Council unanimously adopted the Long-Term Rental Registration ordinance. At that same meeting, the Town Council amended the LTR Task Force Roles and Responsibilities to pause the LTR meetings until January 2024 when the group would reconvene to review the results of the LTR housing data gathered from registrations in 2023. That change also allowed the Task Force to meet as necessary to develop recommendations on an inspection component and any other elements of Chapter 130, and report those recommendations back to the Town Council.

She further explained that the registration requirement of the Chapter 130 ordinance went into effect on January 1, 2023. Over the course of 2023, the Code Office issued 468 LTR registrations and 34 new registrations to date in 2024. Two notification postcards were sent to property owners in 2023 to inform them that this was a new required registration and explain how to obtain an application.

III. Review data gathered from the LTR registrations

Chief Bartlett began by noting that he was pleased to see the number of registrations that had been received but was concerned with some of the requirements that property owners stated they were not in compliance with, such as units equipped with smoke and CO2 detectors. He added that this required by state law and not unique to just Bar Harbor.

Ms. Howard wondered if there was a way to get more information on insulation in units, particular the ones described as seasonal rentals. She thought it would be beneficial to know if houses were insulated, to understand if a seasonal unit could become a year-round rental. The Task Force discussed the issue.

The Task Force spent time discussing what employee housing was and how it could be more clearly described on the application to truly understand the demographics of the data.

Mr. Minutolo suggested that the application include a question asking if the landlord offers a lease to the tenant(s), and if so, for how long.

The Task Force discussed public outreach and education and ways to ensure proper information was readily available and easy for landlords and tenants to find. It was suggested and agreed upon, that an occasional newsletter emailed to landlords could be an efficient way to get information out. The Task Force also discussed whether a courtesy inspection should be offered. There was some discussion around what a courtesy inspection would look like and what inspectors would be looking for during those inspections. The staff agreed to come up with a draft outline of what a courtesy inspection might include.

Mr. Mountford explained some of the criteria that he uses as an inspector for the Housing Authority and suggested some documents that might be helpful for the group to look at.

Chief Bartlett cautioned the Task Force that he didn't want to totally abandon the safety component of what this group was tasked with considering. He was concerned that the life safety standards were being watered down.

Mr. Minutolo wondered if there was money available, maybe a grant, that could be used to purchase smoke and carbon monoxide detectors to give to tenants if they didn't have any. Chief Bartlett said that his department has on occasion, provided smoke detectors to people when there were none present.

For the next meeting, staff would update the application form as discussed, update the data spreadsheets, find out how many of the LTR registrations are also registered as short-term rentals, prepare a draft courtesy inspection list, and draft an educational newsletter for landlord and tenant outreach. It was suggested that the Task Force members look at the housing page on the town website and give suggestions for improvements at the next meeting.

IV. Items for the next Agenda

There was none.

V. Adjournment

The Chair adjourned the meeting at 5:10 PM.

Updated Application Form

LONG-TERM RENTAL REGISTRATION

For properties rented for periods of 30-days or more.
Please use separate form for each dwelling unit.

New Application

Renewal Application

Is your dwelling safe?

An estimated 83% of fire deaths in Maine from 2011 - 2020 took place in the home.

Year	Fires	Deaths
2020	14	17
2021	23	27
2022	16	19
2023	22	29

Statistics

- Roughly three out of five fire deaths happen in homes with either no smoke alarms or no working smoke alarms.
- More than one-third (38 percent) of home fire deaths result from fires in which no smoke alarms are present.
- The risk of dying in a home fire is cut in half in homes with working smoke alarms.

Safety Tips

- Install smoke alarms in every sleeping room and outside each separate sleeping area. Install alarms on every level of the home. Install alarms in the basement.
- It is best to use interconnected smoke alarms so that when one smoke alarm sounds, they all sound.
- Test all smoke alarms at least once a month. Press the test button to be sure the alarm is working.
- A closed door may slow the spread of smoke, heat, and fire.
- Working smoke alarms are an important part of a home fire escape plan.

Carbon Monoxide

Carbon monoxide, or CO, is a gas that can cause sickness, coma or death when it builds up in enclosed spaces. It is not seen, does not smell and cannot be tasted. Warning signs of poisoning include headache, nausea, vomiting, dizziness, drowsiness, and confusion, but no fever. Carbon monoxide exposure results in over 100 emergency department visits each year in Maine. Every home in Maine should have a carbon monoxide detector--about half of Maine homes do not have a carbon monoxide detector.

To Avoid Carbon Monoxide Poisoning During Power Outages:

- Place generators outdoors in a well-ventilated location.
- Ensure the generator is **at least 15 feet** away from home windows or doors, including those of neighboring homes and buildings. Make sure the generators exhaust is directed away from doors, windows, and vents.
- Ensure the generator is not placed in an enclosed or semi-enclosed space (such as basement, cellar bulkhead, attached garage) where carbon monoxide can build up to dangerous levels.
- Use kerosene heaters in a well-ventilated room, by either keeping doors to other rooms open or keeping a window partially open (at least 1 inch) Use only K-1 grade fuel in kerosene heaters Follow instructions for setting the wick height.

- Do not use outdoor cooking devices indoors (such as gas or charcoal grills, gas camp stoves).
- Do not use indoor gas cooking stoves for heat.
- Keep chimney flue and a window open when burning decorative gas fireplace logs as a heat source.
- Place an electric carbon monoxide detector with battery back-up power outside each sleeping area. CO detectors are available in most stores. Look for the UL mark with the "Single Station Carbon Monoxide Alarm" statement. By law, all rental units must have a CO detector. Talk to your landlord if you don't have one in your apartment or rental house.

FAQ's

Why do I need smoke detectors?

Smoke alarms sense smoke well before you can, alerting you to danger.

In the event of fire, you may have as little as 2 minutes to escape safely, which is why smoke alarms need to be in every bedroom/sleeping area, outside of the sleeping areas (like a hallway), and on each level of the home (including the basement). Do not put smoke alarms in your kitchen or bathrooms.

Where do I put smoke detectors in my home?

- Install smoke alarms inside and outside every bedroom and sleeping area (like a hallway).
- Install on every level of the home, including the basement.
- A smoke alarm should be on the ceiling or high on a wall.
- Keep smoke alarms away from the kitchen to reduce nuisance, or false, alarms. They should be at least 10 feet (3 meters) from the stove.
- Check the manufacturer's instructions for the best place for your alarm.
- Only qualified electricians should install hardwired smoke alarms.

Do I need a permit to rent out a dwelling for more than 30 days?

Yes, every dwelling which is rented for periods of more than 30 days is required to obtain an annual registration. Long-term rental registration applications can be obtained at the municipal building or online at <https://www.barharbormaine.gov/535/Long-Term-Rentals>.

Who can I contact if I think my dwelling is unsafe?

You can contact the Code Enforcement Department at 207-288-3329 and your issue will be directed to the person who can assist you.

2023 Bar Harbor housing numbers

48 Dwelling units permitted

658 Short-term rentals registered

468 Long-term rentals registered

May is Building Safety Month

History of Building Safety Month

Building Safety Month aims to raise awareness about the importance of building codes so that the general public has all the necessary info to ensure the safety of their homes, workplaces, and more.

While the phrase 'building codes' may sound like a modern concept, it can be traced back to about 2000 B.C. during the reign of Hammurabi, the founder of the Babylonian Empire.

In the U.S., the first building codes were established in 1625 to address fire safety and specific materials as coverings for roofs. In 1630, Boston scrapped the use of chimneys made from wood and roof coverings made of thatch. And, during the late 1770s, George Washington recommended that area- and height limitations be imposed on wood-frame buildings in Columbia district plans. 1788 was the year that saw the first formal building code written in the U.S. (in old Salem, a place notorious for its fires). More U.S. cities started to establish building codes in the early 1800s and, finally, New Orleans became the first city in 1865 to enact a law that required the inspection of public places.

Thomas Jefferson and George Washington encouraged the development of building regulations to offer minimum standards to building residents for health and safety. Exit requirements became more prominent by 1862. These were followed by plumbing regulations in around 1880, and elevator and hoist regulations in 1883. It was during the 1880s that steel frames emerged and paved the way for tall buildings and skyscrapers.

5 Facts About Building Safety That You Should Know

1. Life inside buildings

According to the U.S. Environmental Protection Policy, 90% of our lives are spent inside buildings.

2. Huge energy consumption

Buildings account for 40% of greenhouse gas emissions and 40% of total energy consumption in the U.S.

3. Fires of history

The great fires in the history of mankind that have led to the development of building codes include the Great Fire of Rome (64 A.D.), the Great Fire of London (1666), the Great Chicago Fire (1871), the Great Baltimore Fire (1904), and the Cleveland Clinic Fire (1929).

4. Fire protection

The MGM Grand fire in Las Vegas in 1980 and the Station Nightclub fire of Rhode Island in 2003 led to the addition of fire prevention systems like sprinkler systems, exit lights, and more.

5. I-Codes

The International Code Council has a set of 15 model codes specified on the basis of geographic locations and these are collectively called 'I-Codes.'

Information about

Subject: Public Housing Data
Attachments: Public Housing units.RTF

Hi Angie,

So I've attached a list of the Public Housing units in Bar Harbor. They include some of the information from the survey. As for the other questions

- Year built Malvern Belmont 1974 (1-50)
 Malvern Belmont (Maine State section (51-74) 1978
 Rodick Lorraine 1982
 Woodbury Rd. and Prospect 1980
- All units are year round
- All units have one bathroom, toilet
- Malvern Belmont including Maine State (1-74) and Rodick Lorraine have sprinklers and Fire alarm systems
- All units have smoke and carbon monoxide detectors, hardwired (sealed batteries by 12/24), Each unit will have one on each level and one audible (within 21 ft.) from each bedroom and one in each bedroom by 7/1/24
- Heat source is oil for Malvern Belmont (1-50) and Rodick Lorraine. Heat pumps for Woodbury Rd. and Prospect and Maine State section (51-74) of Malvern Belmont.

I hope this works. We will have to reach out to the three property owners Downeast Horizons (6 units), Harbor Hill, (24 units) and Parish House (6 units) if you would like information on those subsidized units.

Subject: Public Housing Data
Attachments: Public Housing units.RTF

Hi Angie,

So I've attached a list of the Public Housing units in Bar Harbor. They include some of the information from the survey. As for the other questions

- Year built Malvern Belmont 1974 (1-50)
 Malvern Belmont (Maine State section (51-74) 1978
 Rodick Lorraine 1982
 Woodbury Rd. and Prospect 1980
- All units are year round
- All units have one bathroom, toilet
- Malvern Belmont including Maine State (1-74) and Rodick Lorraine have sprinklers and Fire alarm systems
- All units have smoke and carbon monoxide detectors, hardwired (sealed batteries by 12/24), Each unit will have one on each level and one audible (within 21 ft.) from each bedroom and one in each bedroom by 7/1/24
- Heat source is oil for Malvern Belmont (1-50) and Rodick Lorraine. Heat pumps for Woodbury Rd. and Prospect and Maine State section (51-74) of Malvern Belmont.

I hope this works. We will have to reach out to the three property owners Downeast Horizons (6 units), Harbor Hill, (24 units) and Parish House (6 units) if you would like information on those subsidized units.
